

Golden City Structure

(ABOVE) The Golden City Vortex of "Malton" as it appears on the I AM AMERICA prophecy map. [Malton is located in Illinois and Indiana.]

VORTICES SEEM TO APPEAR AT INTERSECTIONS OF THE EARTH'S GRID, or biomagnetic field of the Earth. These intersecting strands of Earth's energy are also known as ley lines. The ancient symbol for a vortex is a cross in a circle. In the I AM America prophecies, each Golden City Vortex is marked by a Maltese Cross within a circle.

The I AM America prophecies describe the Golden Cities as large vortices and their size is over 434 kilometers in diameter (approximately 270 miles) and 400 Kilometers high (approximately 248.5 miles). Their sacred shape is built as a series of 4-three sided pyramids (tetrahedrons) with a fifth pyramid (octahedron) as the capstone. This represents man's consciousness evolving from a third dimensional orientation to fourth and fifth dimensional awareness. The introductory prophecies about the Golden Cities refers to these areas as "protected" and that they would serve as a focus for "interaction with spiritual energy."

Golden City Vortices are formed when eight (8) leilines intersect. Their movement in a clockwise motion takes in and disperses energy. [This energy is the Ray of the Golden City. For more information see the I AM America e-lesson: [Seven Rays Of Light and Sound](#).] When moving in a counter-clockwise motion, Golden City Vortices remove and purify energies. Through this movement, Golden Cities contain a recognizable pulse or vibration. This effect can be sensed 20 to 40 miles before entering the vortex.
